

SECURITY OPERATIONS PLAYBOOK v2.3

Owner: SOC | Classification: RESTRICTED | Tools: Sentinel, CrowdStrike, Darktrace

Effective: 2025-01-01 | Version: 2.3 | Distribution: SOC Team, CISO, IT Leadership

1. SOC Tier Structure

Tier	Role	Hours	Responsibilities	Escalation Trigger
L1	SOC Analyst	24x7 shift	Alert triage, false-positive review, standard runbook execution, ticket creation and update	Severity High+; unknown malware; confirmed breach indicator; Tier 0 asset affected
L2	Senior SOC Analyst	24x7 on-call	Deep investigation, threat hunting, SIEM queries, IOC extraction, containment for individual endpoints	Multi-system lateral movement; data exfiltration suspected; C2 beacon active
L3	Incident Response	Business hours + on-call	Full IR, forensics, malware RE, MITRE ATT&CK; mapping, executive briefing preparation	Active APT; ransomware detonation; confirmed data breach; regulatory notification threshold met
CISO	David Kim	On-call 24x7	Final escalation authority, regulatory notifications, external comms, board briefing	Ransomware > 20 systems; confirmed exfiltration; any breach involving EU personal data

2. Phishing Response Playbook

Step	Action	Tool / Command	Decision Gate
1	Obtain full email headers from reporter	Outlook: File > Properties > Internet Headers or Exchange Admin Center > Message Trace	If reporter clicked link or opened attachment — treat as active compromise; jump to Step 6 immediately
2	Extract and defang all IOCs	CyberChef: extract URLs, IPs, hashes. Defang by replacing . with [.] and // with [//]	IOCs match TI — severity High automatically; proceed to Step 5
3	Check IOCs against threat intelligence	Sentinel: ThreatIntelligenceIndicator where NetworkIP == ". Cross-check VirusTotal	Any TI match — escalate to L2. No TI match — continue at L1
4	Search for other recipients in org	Exchange Admin: Message Trace by sender and subject. Last 7 days	More than 10 recipients — mass phishing; escalate to L2 and send org-wide awareness alert
5	Block sender and malicious URLs	Exchange: New-TenantAllowBlockListItems -ListType Sender. Defender: block URL in Indicators	If user clicked — proceed to Step 6
6	Investigate endpoint if user clicked	CrowdStrike: query ProcessCreated for affected user in last 2 hours	Suspicious process found — isolate (Step 7). No process — monitor 24 hours elevated
7	Isolate compromised endpoint	CrowdStrike: falcon host containment --host-id --action contain	Always confirm with user's manager before isolating prod systems during business hours

3. Ransomware Response Playbook

Step	Action	Detail	Escalation
------	--------	--------	------------

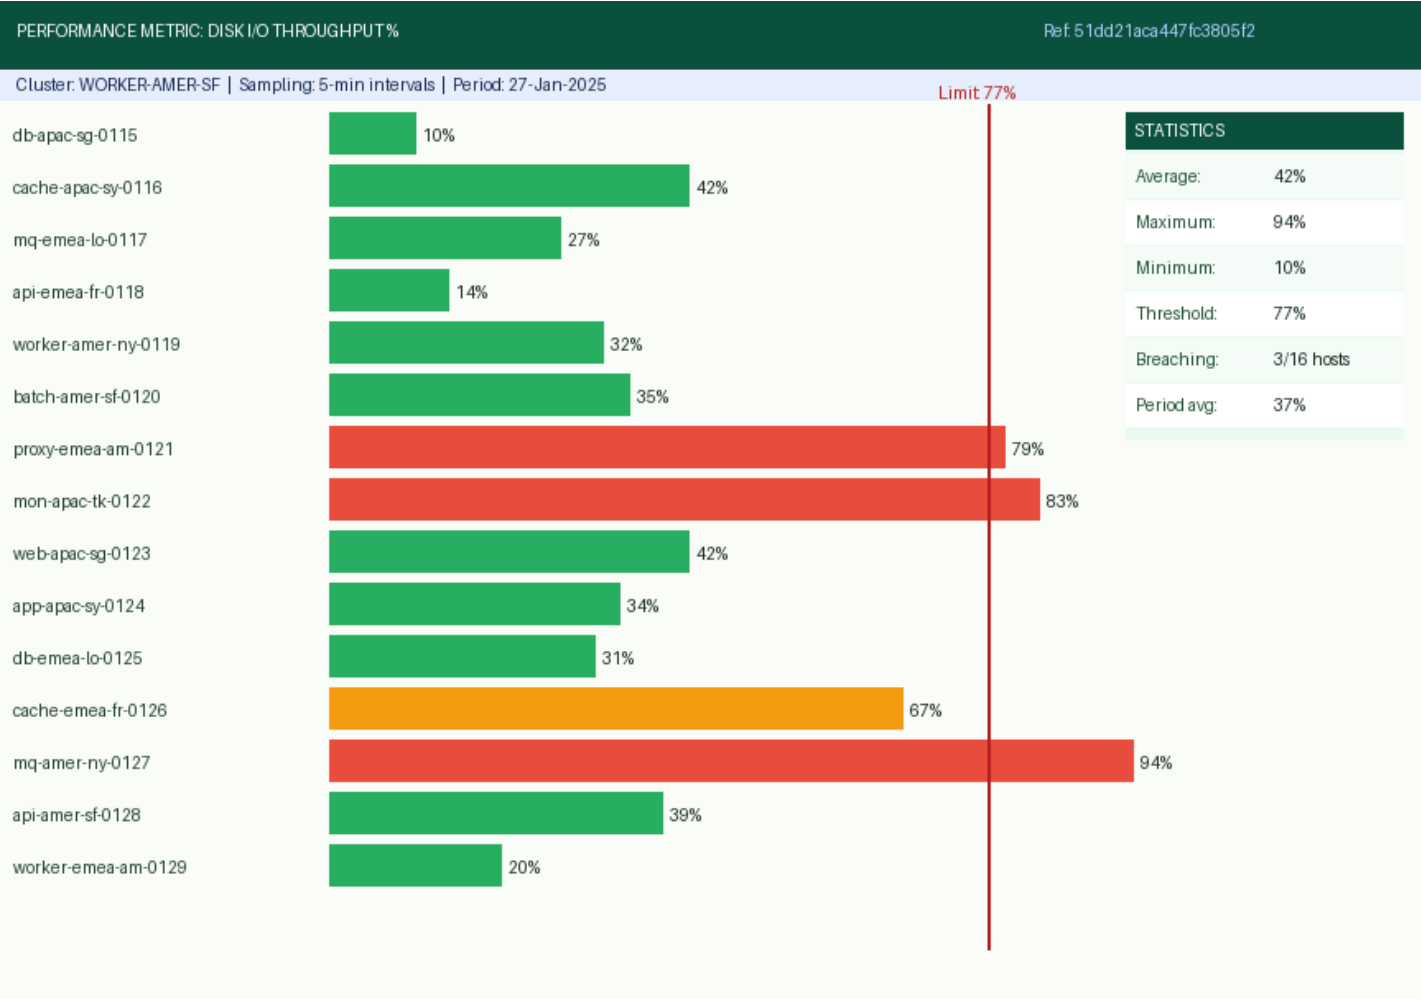

1	Identify affected hosts	Sentinel: SecurityEvent where EventID==4663 where ObjectName endswith '.encrypted' summarize count() by Computer	More than 3 hosts — assume active lateral spread; escalate to L3 immediately and open Crisis Bridge
2	Isolate affected hosts	CrowdStrike: contain host within 2 minutes. Network: work with NOC to block VLAN if multi-host	Notify host owner and manager within 10 minutes. CISO notified immediately if Tier 0 or Tier 1 asset
3	Identify ransomware family	CrowdStrike detection name; upload sample to Triage sandbox. Check decryptors at nomoreransom.org	If decryptor exists — document and continue. No decryptor — data recovery from backup only
4	Search for C2 and lateral movement	Sentinel: NetworkCommunication where RemoteIP not in (trusted_ips) where ProcessName in (known_ransomware)	Any C2 beacon to external IP — block at firewall immediately. Speed over precision
5	Disable compromised user accounts	Okta Admin: suspend user. AD: Disable-ADAccount. Invalidate all SSO tokens via session revocation	Confirm with HR before disabling — if insider threat suspected, involve Legal before notifying user
6	Activate DRP if > 5 hosts affected	Contact Incident Commander James Wu (+1-555-0100). DRP activation at CTO discretion. See DR Plan.	If personal data encrypted: GDPR Art.33 clock starts now. DPO notified within 30 minutes

APPENDIX — SOC ALERT VOLUME AND MTTR DATA LOG

System telemetry and operational records cycling through 12 data types: incident logs, patch matrices, performance metrics, change records, network stats, capacity trends, vendor scorecards, risk registers, asset inventories, backup reports, access reviews, and config baselines. Each page is unique.
